Introduction to Counting

э.

• • • • • • • • • •

bool and **order**

Notation

Write $|\tau|$ to denote the number of elements in type τ .

```
datatype bool = false | true
    datatype order = LESS | EQUAL | GREATER
What size are they?
```

- 4 回 ト 4 三 ト 4 三 ト

bool and order

Notation

Write $|\tau|$ to denote the number of elements in type τ .

datatype bool = false | true datatype order = LESS | EQUAL | GREATER What size are they?

> $|\mathbf{bool}| = 2$ $|\mathbf{order}| = 3$

	Types

▲ □ ▶ ▲ □ ▶ ▲ □ ▶

bool and order

Notation

Write $|\tau|$ to denote the number of elements in type τ .

```
datatype bool = false | true
datatype order = LESS | EQUAL | GREATER
What size are they?
```

 $|\mathbf{bool}| = 2$ $|\mathbf{order}| = 3$

Often, we refer to **bool** as 2 and **order** as 3:

```
true:2
```

イロト イヨト イヨト イヨト

Question

What is $|\tau_1 \times \tau_2|$?

2

イロト イヨト イヨト イヨト

Question

What is $|\tau_1 \times \tau_2|$?

 $| au_1| imes | au_2|$ - hence, the notation.

イロト イヨト イヨト イヨト

2

Question

What is $|\tau_1 \times \tau_2|$?

 $|\tau_1| \times |\tau_2|$ - hence, the notation.

For example,

$$|\mathbf{bool} \times \mathbf{order}| = |\mathbf{bool}| \times |\mathbf{order}|$$

= 2 × 3
= 6

3

イロト イヨト イヨト イヨト

What do you know!

Theorem: Commutativity of Products

For all τ_1, τ_2 :

 $\tau_1 \times \tau_2 \simeq \tau_2 \times \tau_1$

Theorem: Associativity of Products For all τ_1, τ_2, τ_3 : $\tau_1 \times (\tau_2 \times \tau_3) \simeq (\tau_1 \times \tau_2) \times \tau_3$

3

・ 何 ト ・ ヨ ト ・ ヨ ト

What do you know!

Theorem: Commutativity of Products

For all τ_1, τ_2 :

 $\tau_1 \times \tau_2 \simeq \tau_2 \times \tau_1$

Theorem: Associativity of Products For all τ_1, τ_2, τ_3 : $\tau_1 \times (\tau_2 \times \tau_3) \simeq (\tau_1 \times \tau_2) \times \tau_3$

Question

How do we know?

Proving Type Isomorphisms

To prove that $\tau \simeq \tau'$, we need a *bijection* between τ and τ' .

э

• • • • • • • • • •

Proving Type Isomorphisms

To prove that $\tau \simeq \tau'$, we need a *bijection* between τ and τ' .

We write two (total) functions, $f : \tau \to \tau'$ and $f' : \tau' \to \tau$, such that f and f' are *inverses*.

f' (f x) \cong x f (f' x) \cong x

Associativity of Products: Proved!

Let's prove associativity of products:

$$au_1 imes (au_2 imes au_3) \simeq (au_1 imes au_2) imes au_3$$

-

э

Image: A match a ma

Associativity of Products: Proved!

Let's prove associativity of products:

$$au_1 imes (au_2 imes au_3) \simeq (au_1 imes au_2) imes au_3$$

Need to write:

$$f: \tau_1 \times (\tau_2 \times \tau_3) \to (\tau_1 \times \tau_2) \times \tau_3$$

$$f': (\tau_1 \times \tau_2) \times \tau_3 \to \tau_1 \times (\tau_2 \times \tau_3)$$

< 4 P < 4

Associativity of Products: Proved!

Let's prove associativity of products:

$$au_1 imes (au_2 imes au_3) \simeq (au_1 imes au_2) imes au_3$$

Need to write:

$$f: \tau_1 \times (\tau_2 \times \tau_3) \to (\tau_1 \times \tau_2) \times \tau_3$$

$$f': (\tau_1 \times \tau_2) \times \tau_3 \to \tau_1 \times (\tau_2 \times \tau_3)$$

Nice!

$$f = fn (a, (b, c)) \Rightarrow ((a, b), c)$$

 $f' = fn ((a, b), c) \Rightarrow (a, (b, c))$

< A > <

Multiplicative Identity?

- How many functions are there of type $A \rightarrow 2? 2^{|A|}$

How many (total) values are there of type $A \rightarrow B$, in terms of |A| and |B|?

- How many functions are there of type 2 \rightarrow A? $|A| \times |A|$
- How many functions are there of type $A \rightarrow 2$? $2^{|A|}$

Theorem

There are $|B|^{|A|}$ total functions from type A to type B.

Example: Power of a Power

In math, it's true that:

$$(C^B)^A = C^{A \times B}$$

3

(日)

Example: Power of a Power

In math, it's true that:

$$(C^B)^A = C^{A \times B}$$

In terms of types, that would mean:

$$A
ightarrow (B
ightarrow C) \simeq A imes B
ightarrow C$$

э

Example: Power of a Power

In math, it's true that:

$$(C^B)^A = C^{A \times B}$$

In terms of types, that would mean:

$$A \rightarrow (B \rightarrow C) \simeq A \times B \rightarrow C$$

Yes!
